

Sacred Heart Girls' College

First Aid Policy

Sacred Heart Girls' College is a school which operates with the consent of the Catholic Archbishop of Melbourne and is owned, operated and governed by Melbourne Archdiocese Catholic Schools Ltd (MACS).

Purpose

This policy is aligned with the First Aid Policy for MACS schools. The policy sets out the actions and resources required in Sacred Heart Girls' College to ensure adequate first aid provision for students, staff and others in the school environment and when engaged in school approved activities.

Scope

This policy applies to students, staff, families and others at Sacred Heart Girls' College.

Principles

The following principles underpin this policy:

- our school has a responsibility to ensure a safe working and learning for all members of school communities
- the principal and all staff have a duty of care to all students and the provision of adequate facilities and resources supports this in the school.

Policy

Sacred Heart Girls' College is responsible for providing first aid assistance to students in the event of illness or a medical emergency.

First aid facilities

The principal ensures that first aid facilities are in place to meet the needs of staff, students and others in school environments and for school approved activities, including for off-site activities such as camps and excursions, and out of hours school events. The area has appropriate signage and is readily identified as Sick Bay. In this area, the First aid facilities are supervised by Administration staff, all of whom have First Aid qualifications.

Sick Bay is located next to the Front Office.

Sick Bay and Front Office facilities include: storage for general medical supplies (including general use auto-injectors and Ventolin); storage for individual student medications; access to computer for recording of all First Aid attendance and treatment in SIMON; landline and mobile phone; adjustable first aid chair; accessible toilet and shower; eye-wash; storage for off-campus first aid kits; bio-waste and sharps disposal units; full PPE kits. Defibrillators are located in the Front Foyer and Hall.

Sufficient staff must be trained under the provisions of the *Occupational Health and Safety Act 2004* (Vic.) to ensure adequate provision of first aid, based on the number of students in the school or engaged in the activities, the activities being undertaken and the school environment.

First aid kits

First aid kits are located in Learning Support, Food Studies, McBride Fitness Centre, Science Lab and the Year Level Leader offices. These kits are prepared in accordance with the Victorian Government First Aid Kit Contents Checklist.

The maintenance of first aid kits is the responsibility of Administration staff.

First aid kits for camps and excursions are prepared by Administration staff in line with school's activity records. These kits are prepared in accordance with the Victorian Government First Aid Kit Contents Checklist.

First aid staff and training

First aid officers provide initial care to injured students, staff or others in accordance with their level of training. They are not required to diagnose conditions or provide ongoing medical assistance.

The principal or their delegate will ensure that designated first aid officers and general staff have completed the recognised training. A first aid officer with current first aid qualifications must always be available to respond and assist an ill or injured person.

Where appropriate, a first aid officer will refer the ill or injured person to additional medical advice or assistance.

Additional staff with relevant training must be available depending on the student population, proximity to medical facilities, and the nature of activities being undertaken.

Training for anaphylaxis management is undertaken by all staff in the school.

A register of all first aid training is kept in the school by Deputy Principal Staff. All staff maintain first aid qualifications within the College Professional Learning Program.

Administration of First Aid

School staff are responsible for providing first aid assistance to students in the event of illness or a medical emergency.

Our school staff who have been trained will administer first aid in accordance with their training. Trained staff can provide basic first aid with [DRSABCD](#).

In a medical emergency, staff take emergency action and do not need to obtain parent/carer consent to do so. Staff contact Triple Zero "000" for emergency medical services at any time.

On each occasion where first aid is administered to a student with a minor injury or condition, our school staff will notify parents/carers by contact details available at school. On each occasion where first aid is administered for a serious injury or condition, or in an emergency, school staff will attempt to contact parents/carers or emergency contacts as soon as reasonably practical.

Administration of First Aid for head injury

For students who have an impact to the head, suspected concussion, or observed concussion, our school staff can use [Concussion Recognition Tool 5 or recognised tool/app as chosen by the school](#) to help identify a suspected concussion.

If a student demonstrates symptoms of a [moderate to severe head injury](#) (neck pain or tenderness, double vision, weakness or tingling/burning in arms or legs, severe or increasing headache, seizure or convulsion, loss of consciousness, deteriorating conscious state, vomiting, increasingly restless, agitated or combative), the school is to call an ambulance immediately. If the [Concussion Recognition Tool 5 or recognised tool/app as chosen by the school](#) is used, the school must contact the parent/carer about the injury, even if the symptoms resolve. In the event of a suspected concussion, the parent/carer is asked to collect the student and have a medical assessment.

If a student has been diagnosed with a concussion/mild head injury, our schools will act on medical advice where this is provided to support a return to school and associated activities including participation in sport.

Communication with parents / carers

The school requires parents provide up-to-date and accurate medical information relating to students, including information about conditions such as anaphylaxis, asthma and diabetes. Parents are requested to provide this information annually, prior to camps and excursions and if the child's medical condition changes since the information was provided.

Records of incidents, injuries and first aid treatment are documented. First aid records are retained within the school and in line with MACS policies for information recordkeeping, retention and disposal.

An incident report will be completed when first aid is administered. This report will be kept in the school and a copy provided for the parent / carer of the student.

Parents / carers are notified as soon as possible if required to collect an ill or injured student from the school. When a parent / carer cannot be contacted, the principal will contact the emergency contact nominated by the parent / carer.

Student medical information is provided via Operoo Profile. Parents and carers are instructed to ensure information is accurate and up to date with each activity Operoo letter.

In the event of an incident, injury or when a student becomes ill at school parents are contacted by Administration staff via telephone. In the event of an emergency, Triple Zero services are engaged. Nurse on Call and Poisons Helpline are consulted when necessary.

This policy and other school policies and procedures for the distribution of medication and management of students with medical conditions are available via PAM and the College Website.

Definitions

First aid

The emergency treatment provided to employees, students and others who suffer injury or illness while at work/school, using the facilities or materials available at the time. In the case of severe injury or illness, members of staff are not required to diagnose or treat the condition apart from carrying out the appropriate first aid procedures. Diagnosis and treatment are the responsibility of the ambulance officer or medical practitioners.

First aid officers

Staff members who have been trained in first aid and are designated to provide initial care of ill or injured staff, students or others.
